

Hurricane City

Newsletter July 1, 2021

147 North 870 West Hurricane UT 84737 * 435.635.2811 * www.cityofhurricane.com

FULL FIRE RESTRICTIONS

With the legal date of discharge of fireworks approaching, Hurricane City, in conjunction with Hurricane Valley Fire District, Washington County and the State of Utah reiterate the hazardous situation we find ourselves in with the prolonged drought coupled with the elevated temperatures.

In light of the conditions that exist, and the need to mitigate potential catastrophic fires, Hurricane City has implemented **FULL FIRE RESTRICTIONS** throughout all private and public lands within Hurricane City. These restrictions also include all restrictions imposed by the **Fire Restriction Order issued by the State of Utah.**

The penalty and sanction for any violation may carry a class B misdemeanor charge, with a fine of up to \$1,000.00 per incident, plus surcharge and restitution, and up to six months in jail.

RESTRICTED ACTIVITIES

NO ALLOWABLE AREAS FOR 2021

1. Igniting, building, or using any fire, including agricultural burning, which is not contained in a manner so as to prevent the spreading of such fire.
2. The use of combustible materials, such as charcoal briquettes, that are not contained in a manner so as to prevent the spreading of a fire or the unintended starting of a fire.
3. The discharge or use of any fireworks, tracer ammunition or other pyrotechnic devices, including exploding targets. Professional displays may be authorized as reviewed and approved by Hurricane City and Hurricane Valley Fire District.
4. The operation of a motorcycle, chainsaw, ATV, or other internal or external combustion engine without a spark arresting device properly installed, maintained and in working condition, as determined by the Society of Automotive Engineers ("SAE"), recommended practices J335 and J350.
5. The cutting, welding, or grinding of metal in areas of dry vegetation.
6. Smoking, except within an enclosed vehicle, trailer or building, a developed recreation site or areas of a minimum of three (3) feet in diameter cleared down to mineral soil.

The following persons are exempted from the above prohibitions:
*Devices using pellets, pressurized liquid fuel, or gas (stoves, fire pits, grills, heaters, lanterns, etc.) that include shut-off valves are permitted when used in an area at least three (3) feet or more from flammable material such as grasses or pine needles.

2021 ELECTIONS

Hurricane City will be conducting a Primary Election this year for City Council only on Tuesday, August 10, 2021. Candidates running for City Council in the upcoming election are:

- Travis R. Christiansen
- V. Douglas Heideman
- Brian Hawkins
- David M. Hirschi
- Darin D. Larson
- Kevin D. Thomas

Candidates who are not eliminated in the Primary Election will move on to the General Election on Tuesday, November 2, 2021. The seat for Mayor will also be voted on during the General Election.

Candidates running for Mayor are:

- Nanette Billings
- Kevin Tervort

As a reminder, the 2021 Primary and General Municipal Elections will be conducted using Vote by Mail. Eligible registered voters will be receiving their ballots in the mail no later than 2 weeks before each Election Day. In addition, a Voter Assistance Center located inside the Community Center will be available on Election Day to assist voters from 7:00 am to 8:00 pm. For more information regarding registering to vote, updating an existing registration or for additional resources visit <https://vote.utah.gov/>.

PEACH DAYS

Planning for the 23rd annual "Peach Days: A Celebration of our Heritage" is underway, and the

committee is excited for another year of fun, food, entertainment, displays and contests for all! This well-loved event is the

base for many family and class reunions, as well as a wonderful way to reconnect with friends, neighbors and make some new friends too!

****NEW THIS YEAR**** - We will have cash awards for ALL ribbons in our displays (Fine Arts, Home Arts, and Garden, Bottling, and Baking). There will be a premium bank to collect the money awarded for each ribbon. Watch for information as the event gets closer.

****ALSO NEW THIS YEAR**** - We will have a Peach WEEK! Hurricane City promised a celebration when we were back to normal after our COVID break, and some fun events have been planned for it! We will kick off with a concert and food on Monday- followed by a golf tournament on Tuesday.

Peach Days officially opens:

- Thursday, September 2nd, 5:00 pm-10:00 pm
- Friday, September 3rd, 10:00 am-10:00 pm
- Saturday, September 4th, 6:00 am-10:00 pm

As usual we will enjoy the Friday night Rodeo or Movie in the Park, and the Saturday Fun Run, Canal Treks, Parade, Peach Cook-off, and Pioneer Corner. All three days will have Gardening, Fine, and Home Art Displays, THREE stages of entertainment, food, commercial, and homemade sales booths, and activities and games for the young and young-at-heart! Once again, 100 South will be turned into a one-way road to help with traffic and safety. Please watch for signs and be cautious. Shuttles will run from the

church at 274 South 100 West, the school, along the roadside parking spaces and the site of the event.

Community participation is what makes Peach Days such a great event, and we look forward to your shared talents! Entries for displays (Fine Arts, Home Arts, or Garden, Bottling and Baking) can be made Wednesday, September 1st from 4:00 p.m. to 8:30 p.m. Judges will make their decisions that night, and all ribbons will have cash prizes. Volunteers for security are always needed, as well as entries in the variety of contests. Official agendas will be mailed in August and can be found on the Hurricane City website (click on the Peach Days link). We look forward to another year of fun and memory making traditions. Peach Days is a great way to end a summer in Hurricane. We look forward to seeing YOU there!

For more information call:
Jarolyn Stout 635-4204
David Stirland 635-0343
Tom Hirschi 635-4291

WATER DEPARTMENT

As summer is now in full swing, it is important to observe *Time-of-Day Watering Restrictions*. As per City Ordinance, there should be **no outside watering between the hours of 10:00 am and 8:00 pm during the months of June, July, August and September.**

Agricultural lots and new grass plantings are excluded.

Utah is in EXTREME DROUGHT. We don't know how long this drought will last. That's out of our control. But what is in our control is how we respond, and what we do as individuals, families, businesses, institutions and industries to conserve water anywhere we can. Water saved today means we will have more tomorrow.

The "Extreme Drought Watering Guide" is taking the place of the regular Weekly Lawn Watering Guide (we hope temporarily) and focuses on "survival watering." While extreme drought conditions exist, the guide will focus on minimal watering to keep grass **alive. That means just three times a week** in Southern Utah.

60% of residential water use is used for outdoor irrigation. Eliminating just one watering can save about 3,000 gallons for the average quarter-acre Utah yard. Please look for ways to water efficiently and slow the flow.

You can find more info at

<https://drought.utah.gov> and drought tips at <https://slowtheflow.org>.

Keep in mind that if you are using your culinary water to irrigate any outside landscape, it is important to have a backflow device installed to prevent contamination from entering the main water system. Remember, your family would be affected first if backflow occurs. These devices need to be tested annually to make sure they are working properly. If you would like to be added to our reminder list or if you have any questions about backflow, please contact Angie at (435) 635-9442.

It is important to keep a two-foot clearance area around the water meters for easy access in case of leaks or manual meter reading. We thank the residents of Hurricane for their diligence in conserving water in our desert community.

VACATION RENTALS

Hurricane has been found and vacation rentals are booming. Hurricane City **DOES** have regulations and restrictions on whole house rentals and partial home rentals. A license is required for all rentals regardless of where they are located. Please contact the Business

License Department before you start operating a short-term rental.

Are you having trouble with a short-term rental near you? Hurricane City has teamed up with Granicus

to help with enforcement. There is now a 24/7 hotline to report any parking or noise violations of a vacation rental or one that is being used without a license. Call 714-650-8685 or visit

<https://secure.hostcompliance.com/tips> to report any violations.

POLICE DEPARTMENT

For Safety Tips and Upcoming Event information be sure to follow the Hurricane City Police Department Facebook or Instagram pages.

Fingerprinting

As things have gotten back to normal, we wanted to remind citizens that we do offer fingerprinting services.

Live Scan Fingerprint Services are now offered through Hurricane City Police Department by appointment only.

For live scan submissions or two (2) fingerprint cards \$20.00. For concealed weapon renewal four (4) print ink \$5.00.

Appointments are available Monday – Thursday between 9:00 am – 3:00 pm and on Friday between 9:00 am – 1:00 pm. Please contact 435-635-9663 to schedule your appointment.

Pedestrian Traffic Safety Tips

As summer is upon us, we have a lot of events that bring an influx of visitors with the 4th of July, 24th of July and Peach Days events being the

highlights. Please be aware when driving as there are many more pedestrians along State Street and at intersections crossing. Also, be alert in residential neighborhoods with kids being out of

school and the possibility of them playing outside. Following are some good rules to follow:

For Vehicles

1. SLOW DOWN in areas where pedestrians are expected. This will specifically be downtown during our festivities.
2. CHECK ALL CORNERS at intersections every time. Many pedestrian accidents occur when vehicles are making right hand turns and

simply fail to look for the pedestrian crossing the road.

3. MAKE EYE CONTACT which is a good rule for both drivers and pedestrians.

For Pedestrians

1. USE DESIGNATED CROSSWALKS they are placed there for your safety. Of specific concern are the intersections and 100 and 200 West and State Street during festivities. Please take the extra time to walk to either Main Street or 300 West and cross at the crosswalk with a traffic control device.
2. DON'T EXPECT DRIVERS TO SEE YOU be alert to the traffic around you at all times regardless of whether you have the right of way or not.
3. MAKE EYE CONTACT even if the driver has stopped it is best to make eye contact with them to be sure they have seen you.

Thank you to our wonderful citizens—let's continue to do our part to keep our community SAFE!

RECREATION

Group Fitness

Attention Seniors! Hurricane Group Fitness has classes for you! We currently offer 7 “land” classes, 8 “water” classes, and multiple low impact classes that are great for all ages, especially seniors.

We also work with “Silver & Fit” and “Renew Active”

to get your group fitness membership paid for! Come into the Community

Center Monday-Thursday from 11:00 am-3:00 pm to get a schedule, sign up for classes, and see if your insurance plan is covered.

Dance

There are so many NEW and exciting things happening with the Hurricane Dance Program! NEW CLASSES including: Tap, Clogging, Musical Theatre, and Adult Ballet. We have talented NEW and returning

instructors excited to share their love of dance with the community. This fall the Hurricane City Dance Program will be putting on a production of The Nutcracker! If you have a dancer who has ever wanted to perform in the Nutcracker, this is their chance! Sign-ups for fall classes will open on July 15th at www.hurricanerecreation.com . Classes begin September 7th.

Youth & Adult Sports

Check out our variety of Fall Youth Sports including: **Tennis, Cross Country, Golf, Tackle Football, Volleyball, Flag Football and Soccer.** Registration starts July 26th for Volleyball, Flag Football, and Soccer. Don't Forget **Adult Pickleball.** All the fun and information can be found on hurricanerecreation.com . COME PLAY!

Hurricane Theatrical

The City of Hurricane and Hurricane Theatrical are excited to bring you Disney's TARZAN!!

Tarzan will be showing from July 30th – August 28th. Show times will be Monday, Friday and Saturday at 7:00 pm with a matinee showing on Saturdays at 2:00 pm.

Ticket prices:

- \$8 – Kids (Ages 4-12)
- \$18 – Adult (Ages 13-64)
- \$16 – Senior (65+)

We have a Special Preview Night on Thursday, July 29th at 7:00pm with discounted tickets!

Purchase tickets at www.hurricanetheatrical.com or call Debbie 435-668-9753.

Concerts in the Park

Grab your camp chair or favorite blanket and get ready to enjoy an evening of live music every 1st and 3rd Thursday from 8:00 pm–9:00 pm. Concerts run May-September at Pioneer Park, 200 North Main Street. Upcoming performances include:

- July 1 – Emilie Laudie
- July 15 – River House Band
- August 5 – Way Off Broads
- August 19 – Just Barely
- September 2 – Red Dog Acoustic
- September 16 – Carolyn Murset

ANIMAL CONTROL

Animal Control Officers will be patrolling and citing citizens that leave their dogs in vehicles on warm/hot days. Dogs left alone in cars in mild heat are at risk for

heatstroke, a serious condition that can result in organ damage and even death. Many pet owners are shocked to find out just how fast the temperature can rise in

your car. Leaving the windows open does little to affect these high temperatures, according to heat and temperature studies. The best way to keep your pet safe in this situation is to leave them at home.

Independence Day fireworks are the highlight of the summer holidays for many of us, but not for most pets. More animals are lost or injured by cars around the 4th of July than at any other time of the year. Pets may dive through a window, tear through a screen door, or jump a fence in an attempt to escape the terrifying noises. Help protect your pets by securing them in a location where they will feel as safe as possible and not be able to break free or jump out. Many owners find that running up the radio can help drown out the loud booms that frighten pets.

FREE SUMMER LUNCH PROGRAM

Summer meals are available to all children aged 18 and younger within Washington County. June 1st – July 15th lunches are served Monday-Thursday at these locations:

- Community Center, 11:30 am-12:30 pm
- Hurricane Elementary, 12:15 pm–12:45 pm

No meals are served on Friday. For more information see <https://www.washk12.org/food-service/menus> .

GARBAGE PICKUP

Republic Services of St. George will pick-up large items such as couches, chairs, mattresses, refrigerators, freezers, and up to 4 tires at your curbside. Call to schedule a free pick-up appointment at (435) 628-2821. Washington County landfill also accepts tires.

STREETS DEPARTMENT

The Hurricane City Street Department would like to thank the residents of Hurricane for their patience in dealing with this year's slurry and chip seal projects. We realize that road work of this magnitude causes some discomfort, and we very much appreciate the patience of everyone involved.

We would like to remind everyone about trees and bushes that encroach on sidewalks and streets. It is the responsibility of the owner of the tree or shrub to keep them pruned out of the right of way to a distance of 9 feet above the sidewalk and 16 feet above roadways. It is especially critical on corners and around stop, speed and street signs. If you need help to prune trees or bushes, please contact the

Street Department for assistance. We can be reached at 435-668-5620 or 435-668-5634.

It is the season for celebrations, and we would like to remind everyone that during events, parades, and celebrations to please be mindful of traffic control devices and personnel. They are there to keep everyone safe. Have a happy, safe summer.

YOUTH CITY COUNCIL

We have an interest in youth civic engagement and our city is increasingly looking for ways to connect with youth in our community. Connecting with our community's youth to promote civic education and engagement provides a number of benefits and has the potential to create a generation of

active, informed citizens. Learning more about local government functions, roles and responsibilities also builds youth awareness of public sector careers.

We are conducting a Youth City Council each week that serves as a great starting point. We learn how city government works, participate in mock council meetings, hear speaker presentations from elected officials and staff, tour City Hall and municipal facilities. We encourage panel discussions and Q&A sessions with City Council members.

Nanette Billings, our City Councilwoman who oversees Youth City Council works hard to offer more opportunities for our youth. If you are interested and are a student who will be in the equivalent of 9th-12th grade this upcoming school year, please contact Nanette at billings@cityofhurricane.com.

Annual Drinking Water Quality Report 2020 Hurricane City

We are pleased to present to you this year's Annual Drinking Water Quality Report. This report is designed to inform you about the quality of the water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water sources have been determined to be from groundwater sources. Our water sources are Toquerville Spring, Ash Creek Spring, Stratton Well 2, West Well Repl-1, Stratton Well 1 Repl-1 and Washington Co WCD - Sand Hollow UTAH27073.

The Drinking Water Source Protection Plan for Hurricane City is available for your review. It contains information about source protection zones, potential contamination sources and management strategies to protect our drinking water. Our sources have been determined to have a low level of susceptibility from potential contamination. We have also developed management strategies to further protect our sources from contamination. Please contact us if you have questions or concerns about our source protection plan.

There are many connections within our water system. However, unapproved connections and improper plumbing changes can adversely affect the quality of your water. A cross connection can allow polluted water, fertilizer, or other chemicals to contaminate the water supply system when not properly protected. Not only can this affect your health, but it can also damage plumbing and appliances within your property. So, what can you do? Install backflow preventers at all cross connections within the property.

What does a cross connection look like? The most common cross connection is a landscape irrigation system. Mud, fertilizer, and waterborne pathogens can be siphoned backwards into the drinking water if the irrigation system has no backflow preventer. An unprotected garden hose connected to a fertilizer sprayer, or submerged in a pool or puddle, are also considered cross connections. When a cross connection is unprotected at your home, it will affect your family or employees first. If you would like to learn more about preventing backflow at your property, call us for more information.

I'm pleased to report that our drinking water meets federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Ken Richins at 435-635-9442. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the last Tuesday of each month at 6:00 pm, at the Water Shop Conference Room, located at 646 West 600 North.

Hurricane City routinely monitors for constituents in our drinking water in accordance with the Federal and Utah State laws. The following table shows the results of our monitoring for the period of January 1st to December 31st, 2020. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of

some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In the following table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Non-Detects (ND) - laboratory analysis indicates that the constituent is not present.

ND/Low - High - For water systems that have multiple sources of water, the Utah Division of Drinking Water has given water systems the option of listing the test results of the constituents in one table, instead of multiple tables. To accomplish this, the lowest and highest values detected in the multiple sources are recorded in the same space in the report table.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter (ug/l) - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Parts per trillion (ppt) or Nanograms per liter (nanograms/l) - one part per trillion corresponds to one minute in 2,000,000 years, or a single penny in \$10,000,000,000.

Parts per quadrillion (ppq) or Picograms per liter (picograms/l) - one part per quadrillion corresponds to one minute in 2,000,000,000 years or one penny in \$10,000,000,000,000.

Picocuries per liter (pCi/L) - picocuries per liter is a measure of the radioactivity in water.

Millirems per year (mrem/yr) - measure of radiation absorbed by the body.

Million Fibers per Liter (MFL) - million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.

Nephelometric Turbidity Unit (NTU) - nephelometric turbidity unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

Action Level (AL) - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Date- Because of required sampling time frames i.e., yearly, 3 years, 4 years and 6 years, sampling dates may seem outdated.

Waivers (W)- Because some chemicals are not used or stored in areas around drinking water sources, some water systems have been given waivers that exempt them from having to take certain chemical samples, these waivers are also tied to Drinking Water Source Protection Plans.

TEST RESULTS							
Contaminant	Violation Y/N	Level Detected ND/Low -High	Unit Measurement	MCLG	MCL	Date Sampled	Likely Source of Contamination
Microbiological Contaminants							
Total Coliform Bacteria	N	0	N/A	0	5	2020	Naturally present in the environment

Fecal coliform and <i>E. coli</i>	N	N/A	N/A	N/A	If a routine sample and repeat sample are total coliform positive, and one is also fecal coliform or <i>E. coli</i> positive	2020	Human and animal fecal waste
Turbidity for Ground Water	N	0-1.72	NTU	0	5	2019, 2020	Soil runoff
Inorganic Contaminants							
Arsenic	Y	1-10.4	ppb	0	10	2019, 2020	Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes
Barium	N	0.019-0.268	ppm	2	2	2019, 2020	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Copper a. 90% results b. # of sites that exceed the AL	N	a.0.335 b.0	ppm	1.3	AL=1.3	2018	Corrosion of household plumbing systems; erosion of natural deposits
Fluoride	N	0.176-0.527	ppm	4	4	2019, 2020	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Lead a. 90% results b. # of sites that exceed the AL	N	a. 1.37 b.	ppb	0	AL=15	2018	Corrosion of household plumbing systems, erosion of natural deposits
Nitrate (as Nitrogen)	N	0-3.8	ppm	10	10	2020	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Selenium	N	0.6-6.2	ppb	50	50	2019, 2020	Discharge from petroleum and metal refineries; erosion of natural deposits; discharge from mines
Sodium	N	15.606-117.849	ppm	500	None	2019, 2020	Erosion of natural deposits; discharge from refineries and factories; runoff from landfills.
Sulfate	N	27.812-288.347	ppm	1000	1000	2019, 2020	Erosion of natural deposits; discharge from refineries and factories; runoff from landfills, runoff from cropland

TDS (Total Dissolved solids)	N	220-752	ppm	2000	2000	2019, 2020	Erosion of natural deposits
Disinfection By-products							
TTHM [Total trihalomethanes]	N	0.8-4.1	ppb	0	80	2020	By-product of drinking water disinfection
Chlorine	N	0.666	ppm	4	4	2018	Water additive used to control microbes
Radioactive Contaminants							
Alpha emitters	N	0.94-4.7	pCi/1	0	15	2019, 2020	Erosion of natural deposits
Combined	N	0-1.26	pCi/1	0	5	2016, 2018	Erosion of natural deposits
Radium 226	N	0-0.58	pCi/1	0	5	2016, 2018	Erosion of natural deposits
Radium 228	N	0-3.8	pCi/1	0	5	2019, 2020	Erosion of natural deposits

Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with their circulatory system and may have an increased risk of getting cancer.

While your drinking water meets EPA's standard for arsenic, it does contain low levels of arsenic. EPA's standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Hurricane City is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

All sources of drinking water are subject to potential contamination by constituents that are naturally occurring or manmade. Those constituents can be microbes, organic or inorganic chemicals, or radioactive materials. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

We at Hurricane City work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
